Denver Colorado 80202

Dear Ms. Woodward:

**Subject: TONY M MINE PERMIT REQUIREMENTS**

The Utah Pollutant Discharge Elimination System Permits (UPDES) Section has reviewed your inquiry and information provided for the Tony M Mine owned by International Uranium Corporation to determine any permitting requirements for the facility. This letter only addresses the permits that may be required by the UPDES Permit Section.

A Storm Water Construction Permit and a Storm Water Permit for operation at the mine is required. A UPDES discharge permit for process water discharge will not be required if mine dewatering waters or other wastewaters are not discharged to surface water or waterways. Any discharge to ground water or surface water, other than properly permitted discharges could be subject to enforcement activities and/or permitting.

Please contact Tom Rushing at (801) 538-6951 to inquire regarding all storm water permit coverage. Please contact Rob Herbert, at (801) 538-6038, for any questions regarding ground water permitting or regulations.

Sincerely,

Mike Herkimer,  
Manager, UPDES Permits Section  
Division of Water Quality
